

For the use only of a Registered Veterinary Practitioner, Hospital or Laboratory

LUBRIHANS®

(Collagen Peptide, Glucosamine Sulphate, Potassium Chloride,
Sodium Hyaluronate & Chondroitin Sulphate Sodium Tablets)

Composition:

Each film coated tablet contains:

Collagen Peptide Type II	50 mg
Glucosamine Sulphate	
Potassium Chloride	500 mg
Sodium Hyaluronate	70 mg
Chondroitin Sulphate Sodium	275 mg
Excipients	q.s.
Colour: Red oxide of iron	

Category: Joint supplement

Pharmacology:

Glucosamine increases in the chondrocytes synthesis of matrix constituents.

The synergistic effect of chondroitin Sulphate and Glucosamine guarantees the double strength of this chondroprotector.

Chondroitin Sulphate is the key ingredient of the joint cartilage and is most responsible for proper hydration. It is essential to maintain the elasticity and flexibility of the joint, reducing degradation.

Synovial fluid of the joints is composed mainly of hyaluronic acid which contributes to the proper maintenance of synovial fluid, which is the main remedy for joint mobility.

Collagen plays a key role in the growth and strengthening of joints, tendons, and cartilage. Collagen may reduce inflammation and other markers of joint disorders. Collagen is being considered a more "broad spectrum" type supplement in the treatment of osteoarthritis due to its increased bioavailability in its type-II form.

Indications:

- Joint supplement for management of osteoarthritis and degenerative processes of joint cartilage associated with age, obesity or increased physical activity
- Management of hip and elbow dysplasia in large breeds
- Supplement in cases of fracture and orthopedic surgeries
- Adjunct /supplement to NSAIDs

Dosage and Administration:

The usual dose for dog's upto

Upto 10 kg	: 1 Tablet
10 – 20 kg	: 2 Tablets
20-40 kg	: 3 Tablets
